

The evolution of Metro Station :

SMART STATION

2021.10

Operating Status

9 Metro lines

280 stations

305.9 km

7.3 mil/day

Rolling Stock

3,583 cars

Staff

17,077

Transport Share

39%

Fare Revenue

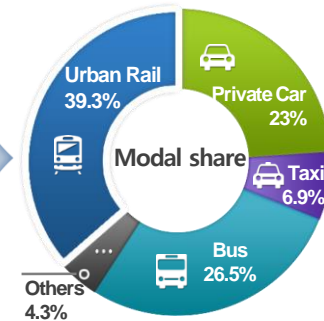

15,389 Bil won
(Bil US\$ / y)

Metro Systems in Seoul Metropolitan Area

Metro 9 lines
315 stations
340 km

Regional Rail 5 lines
93 stations
164 km

LRT 1 line
13 stations
11 km

History of Seoul Metro

Line 1	1974	10 stations, 7.8 km
Line 2	1980	50 stations, 60.2 km
Line 3	1985	34 stations, 38.2 km
Line 4	1985	26 stations, 31.7 km

1970 — 1980 — 1990 — 2000 — 2010 — 2020

Line 5	1995	51 stations, 52.3 km
Line 6	2000	38 stations, 35.1 km
Line 7	1996	51 stations, 57.1 km
Line 8	1996	17 stations, 17.1 km
Line 9	2009	13 stations, 13.6 km

Core Values of Seoul Metro

Safety & Convenience

Customers

Staff

SAFETY CONVENIENCE

For Customers & Staffs

SMART Connected Metro

Direction

Key Strategy

“Customer-Centered Process Innovation”

SMART Connected **Service**

Structure

*Service Innovation For
Customers*

Quality

*Improving Service
Quality*

Diversity

*Maximize Customer
Experience*

“Perfect Urban Railway Operate”

SMART Connected **Operation**

Connected

*Connection / Integration
/ Creating Synergy*

Intelligence

Automation/Intelligence

Efficiency

Operational Efficiency

“Safety First”

SMART Connected **Response**

*Predict & Respond
In Advance*

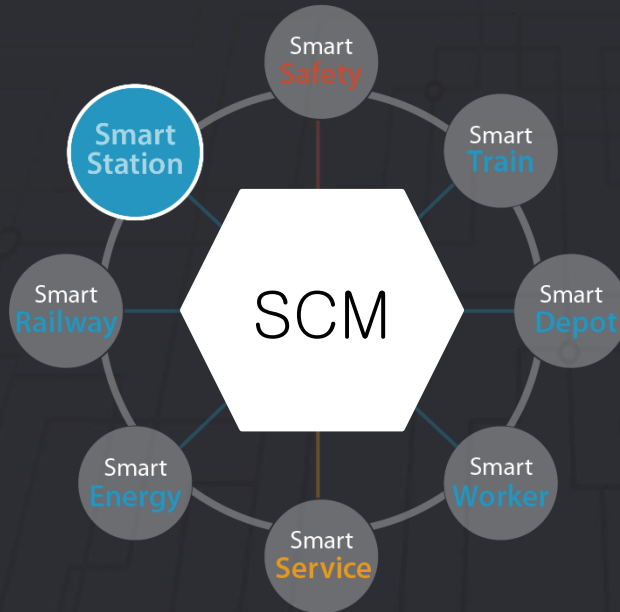

Act

Perfect Response System

Detailed Strategy

Smart Connected Metro

Seoul Metro is digitizing the urban railways in many areas

subway station evolution

SMART STATION

SMART STATION

3D Digital Twin-Based

3D
MAP

Video
Analysis

Intelligent CCTV System

Integrated
Management

Connecting various Facilities

Fire

IoT

PSD

E/V

Shutter

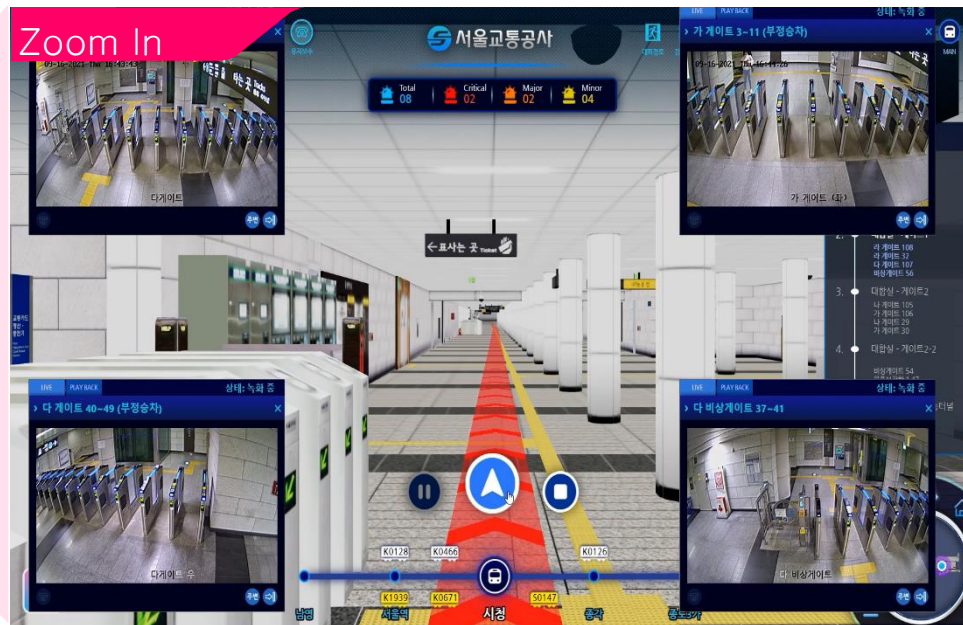

CCTV

3D Digital twin System

Improves the safety and convenience of urban railways through the 3D-based 'Digital Twin' system

3D Digital twin System

Easy to manage Facilities at the station using the 3D Map

Intelligent CCTV System

SMART STATION

Functional Demonstration

Train operation check

Check the train operation status in real time

Check inside the train

Respond quickly in the event of a situation by checking CCTV inside train in real-time at the station

Fire situation check

Immediately Check and Cope in the event of a fire situation

PSD status check

Check the status of PSD in real time

Tunnel status check

Immediately Check and Cope , Enter a tunnel without permission

Virtual Patrol

Verifying the safety of subway station facilities in the same order as an actual patrol

Access control

Control access by detecting those who are not wearing masks

Shutter control

Checking and controlling shutter abnormalities remotely

Smart Station Function

Security management

- Virtual patrol
- Intrusion detection (intelligent type)
- Access management (Tunnel entrance)

Disaster management

- Fire/disaster management
- Evacuation route guidance
- Text message guidance
- Field image display
- Service SOP display
- Emergency manual display

Facility management

- Equipment condition monitoring
- PSD status monitoring
- Shutter control
- Lighting control
- Equipment control machine PSD
- Equipment condition management(FMS)aa

Customer service

- Air quality management (Fine dust/temperature /humidity)
- Bathroom evaluation

Others

- 3D map management
- CCTV video control
- Event management
- Log/statistics management
- Alarm management
- Event level management

Smart Station function and benefit 1

Reducing work time with smart monitoring

Patrol time
reduced by 60%

Smart Station function and benefit 2

Reducing response time with smart remote control

Emergency response time
reduced by 70 %

Conclusion

**Safe
Subway**

Securing the Safety of
Customers and Staffs

**Convenient
Subway**

Improving the
Convenience of Staffs

**Quick
Subway**

Rapid handling of situations
and
Preemptive response to
obstacles
